The average hospital is losing 1%-3% of net patient service revenue due to revenue integrity issues. Complex federal and commercial payer rules make it difficult to obtain 100% of the reimbursement to which a provider is entitled. Further, RACs and other auditors put even collected revenue at risk.

To address these issues many hospitals have started Revenue Integrity initiatives and dedicated resources in attempt to capture this lost revenue. In many cases, these efforts are not producing the anticipated results due to the inability to efficiently identify and quantify the numerous revenue integrity opportunities.

The BVerifiedSM - Revenue Integrity AuditorSM is an automated tool with actionable reporting that enables your hospital to rapidly identify, quantify and resolve revenue enhancement and compliance opportunities.
